Sark Group Water Conservation and Stewardship Commitment

At Sark Group, we recognize the critical importance of water stewardship in fostering sustainable business practices and contributing to the well-being of the communities in which we operate. As a leading player in the injection molding industry in India, we are committed to responsibly managing water resources throughout our operations. This Water Stewardship Policy reflects our dedication to environmental conservation, efficient water usage, and the promotion of water sustainability.

1. Commitment to Responsible Water Use:

Sark Group is committed to using water resources responsibly and efficiently across all our facilities. We will continuously assess and implement measures to minimize water consumption in our injection molding processes, aiming to optimize production while minimizing our water footprint.

2. Monitoring and Conservation:

We will establish comprehensive water monitoring systems at our facilities to track water usage, identify areas for improvement, and ensure compliance with relevant regulations. Regular water audits will be conducted to assess the effectiveness of our conservation efforts and identify opportunities for further enhancements.

3. Sustainable Sourcing:

Sark Group recognizes the interconnectedness of water stewardship and supply chain sustainability. We will work closely with our suppliers to promote responsible water management practices and encourage the adoption of sustainable sourcing methods. Preference will be given to suppliers who demonstrate a commitment to water conservation and ethical water use.

4. Pollution Prevention:

We will implement stringent measures to prevent water pollution in our operations. This includes the proper treatment of wastewater before discharge, adherence to regulatory standards, and the use of eco-friendly materials and processes to minimize the environmental impact of our injection molding activities.

5. Community Engagement:

Sark Group acknowledges the shared responsibility for water stewardship with the communities in which we operate. We will engage with local communities to understand their water-related concerns and implement initiatives that contribute to local water security. Our aim is to be a responsible corporate citizen, fostering positive relationships with the communities that host our facilities.

6. Continuous Improvement:

Sark Group is committed to a culture of continuous improvement in water stewardship. We will invest in research and development to explore innovative technologies and practices that further reduce our water footprint. Regular reviews and assessments of our water stewardship performance will be conducted, and necessary adjustments will be made to align with best practices and industry standards.

7. Regulatory Compliance:

We will adhere to all applicable water-related laws and regulations in India. Sark Group will actively collaborate with regulatory bodies to ensure compliance and stay abreast of evolving standards. Additionally, we will work towards exceeding minimum requirements, setting internal targets for water efficiency and sustainability.

8. Employee Training and Awareness:

Sark Group recognizes the role of our employees in achieving water stewardship goals. We will provide training to our staff on water conservation practices and promote awareness of the importance of responsible water use both at the workplace and in their personal lives.

Through the implementation of this Water Stewardship Policy, Sark Group is dedicated to making a positive impact on water resources, fostering sustainable development, and contributing to a more water-secure future for our communities and the environment. We invite all stakeholders to join us in this journey towards responsible water stewardship
